

NEW TESTS

Effective Date: May 15, 2017

Notification Date: May 15, 2017

New Tests Available Immediately

47589 – LipoFit by NMR

47590 – LipoFit by NMR, Particle Count Only

Performed by ARUP Laboratories.

These tests replace the NMR LipoProfile tests (TMF order codes 45142 and 45138) which will be discontinued on August 1, 2017.

Pricing for the LipoFit by NMR is the same as NMR LipoProfile.

Note: Collection tube for the LipoFit by NMR is the Greiner Bio-One Clot Activator tube. Collection tube for the NMR LipoProfile is the NMR LipoTube. These tubes are the same except for the cap color and label. The NMR LipoTube is a custom branded version of the Greiner Bio-One Clot Activator tube. If your laboratory has a stock of NMR LipoTubes it is not necessary to discard or exchange these tubes. They may be used for the LipoFit tests. Once TMF discontinues the NMR LipoProfile tests we will no longer supply the NMR LipoTube.
