Tests Referred to Prometheus Laboratories

August 2017

The Medical Foundation has established a discrete bi-directional (orders and results) interface with Prometheus Laboratories. As part of this project, all tests referred to Prometheus have been rebuilt in our system with new order codes. These new order codes are available for use immediately; however, we will also accept and process orders with the old order codes through the end of August to allow clients time to build the new codes in their systems. The old order codes will be inactivated on September 1, 2017. Any order received with an old code on or after September 1st will be modified to the new code.

There are no changes to specimen requirements or CPT coding.

A Prometheus Laboratories requisition is required with each submission. Forms are available online.

- Prometheus [Test Requisition](#)

The Medical Foundation does not provide insurance filing or patient billing services for tests referred to Prometheus Laboratories. Orders from hospital clients will be billed to the client's account by The Medical Foundation. Orders from non-hospital clients will be billed to the patient or insurance by Prometheus. Please provide patient demographic information and copies of insurance cards (front and back) as applicable.

New TMF#	Old TMF#	Test Description
43439	47228	PROMETHEUS® Anser® ADA
43442	47002	PROMETHEUS® Anser® IFX
